Angular 17 Overview & Basics

Advanced Angular Topics

Advanced Angular Development

LearnQuest

Aug 8, 2024

**Benjamin Pereira**

has successfully completed the online, non-credit Specialization

## Angular 17

In this specialization, learners were equipped with a comprehensive set of skills to develop, manage, and optimize Angular applications effectively. completing this specialization, learners will have: Proficiency in setting up and configuring an Angular development environment, skills to create, structure, and manage Angular projects with modular components and services, and expertise in data binding, directives, and dependency injection to enhance application interactivity and maintainability. Learners also acquired knowledge of advanced features like dynamic components, SSR, and HTTP client services for robust application development. This specialization ensures that learners can build scalable, maintainable, and high-performance Angular applications, for real-world development.

Viney King

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
